Terminal Disclaimer

This terminal disclaimer is provided in response to the Office action dated December 29, 2006.

The undersigned attorney is an attorney of record for the above-referenced patent application.

The assignee of the entire right, title, and interest in and to the above-referenced patent application is Intel Corporation ("assignee") having a place of business at 2200 Mission College Blvd, Santa Clara, California 95054.

The terminal part of any patent granted on the above-referenced application number 10/625,945 that would extend beyond the expiration of the full statutory term of any patent granted on application number 10/625,944, entitled RECEIVERS FOR CYCLE ENCODED SIGNALS, filed on July 23, 2003, is hereby disclaimed, and it is agreed that a patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to any

patent granted on application number 10/625,945 shall be the same as the legal title to said patent granted on application number 10/625,944, this agreement to run with said patent granted on the above-identified application and to be binding upon the grantor, its successors, or assigns.

If a patent is not granted on application 10/625,944, then this terminal disclaimer will not shorten the life of any patent granted on application 10/625,945. No disclaimer is being made as to any terminal part of any patent granted on application number 10/625,945 prior to the expiration of the full statutory term of any patent granted on application number 10/625,944, in the event that it later expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321(a), has all claims canceled by a reexamination certificate, or is otherwise terminated prior to expiration of its statutory term as presently shortened by any terminal disclaimer, except for the separation of legal title stated above. Note that application 10/625,944 and application 10/625,945 were filed on the same day.

REMARKS

This terminal disclaimer without conceding the correctness of the requirement. See Quad Environmental Technologies Corp. v. Union Sanitary District, 946 F.2d 870 (Fed. Cir. 1991), which states that filing a terminal disclaimer is not an admission as to its necessity. (See, MPEP 804.03.)

Respectfully submitted,

Dated: January 17, 2007
